Tourism and Environmental Change on the Great Barrier Reef

The Reef	Tourism	Environment	Takeaways

Intro statement

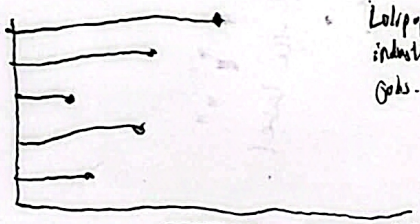

1. Exploring the Great Barrier Reef

2. The Reef : Economic Life line

Brief statements on tourism

2.1 Industries Supported by Tourism

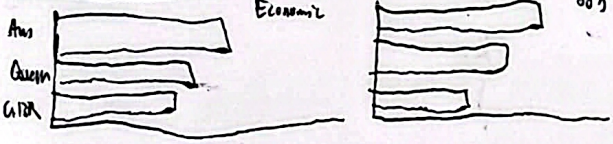

Dropdown — To switch between economic and Job

2.2 How GBR support wider economy

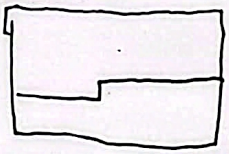

A$ 7.94 Billion

68,000 jobs

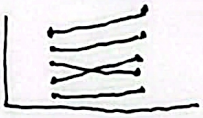

2.2 Who drives tourism

1.75 mil domestic | 637k international | A$ 4.04 bil Total expenditure

waffle chart for dom and inter

2.3 international markets and how they changed through the years

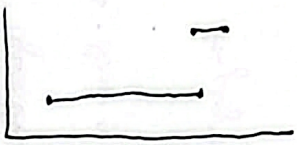

Slope chart of 2025 vs 2026 International visitors

3.1 How have reef tourism activities changed

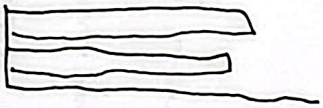

Multiline chart to show changes to visits for the different activities over the years.

3.2 How tourism meets the reef

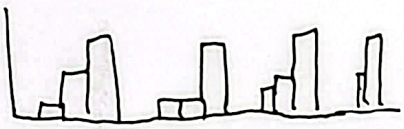

Reef contact and damage

3.3 Hidden environmental cost of reef tourism

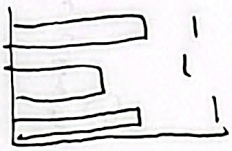

Diver Behaviour and Coral reef Impacts

3.4 Human activities threaten the reef

vessel groun in GBR

3.5 Coral cover change

Bullet chart to see Coral cover decrease across the reef

3.6 Reef under Pressure

~~Marine stress test~~
Marine heat stress map

3.7 Cyclone travel near GBR

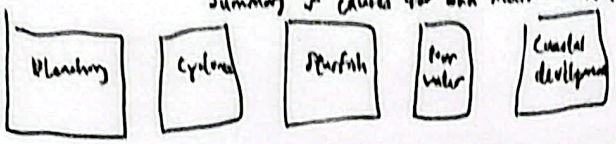

Cyclone travel patterns

3.8 4. Beneath the surface : Environmental Change

Coral cover changed

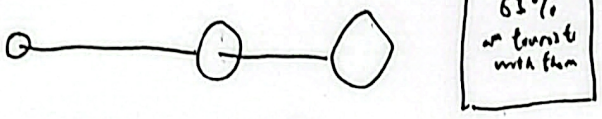

Summary of causes for bad marine health

4. Beyond Tourism : Protecting GBR

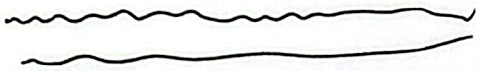

4.1 Growing commitment to responsible Tourism

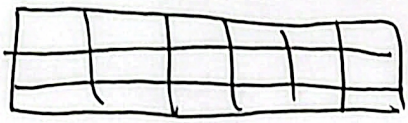

High standard Tourism Operators

63% of tourists with them

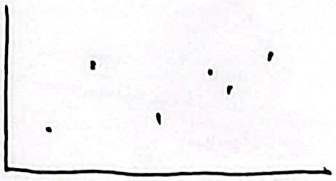

4.2 Keeping eye on reefs

Heat map on number of surveys for each year

4.3 Responding to Coral predators

Dot map to see predators removed during certain months

4.4 ~~Protect~~ Helping Coral recover

Coral restoration activity over certain months

5. Take action

How can tourists help Protect the Reef

Conclusion
